State of Wisconsin Department of Natural Resources dnr.wi.gov

Annual Report under MS4 General Permit No. WI-S050075-1

Form 3400-195 (R 12/13)

Page 1 of 6

Due by March 31, 2014

Notice: Pursuant to s. NR 216.07(8), Wis. Adm. Code, an owner or operator of a Municipal Separate Storm Sewer System (MS4) is required to submit an annual report to the Department of Natural Resources (DNR) by March 31 of each year to report on activities for the previous calendar year. This form is being provided by the DNR for the user's convenience. Personal information collected will be used for administrative purposes and may be provided to the extent required by Wisconsin's Open Records Law [ss. 19.31-19.39, Wis. Stats.].

This form is for reporting on activities undertaken in calendar year 2013.

Instructions: Complete each section of the form that follows. If additional space is needed to respond to a question, attach additional pages. Provide descriptions that explain the program actions taken to comply with the general permit. Complete and submit the annual report by March 31, 2014, to the appropriate address indicated on the last page of this form.

\mathbf{c}	ECTION IV. General Information (continued)
	. Has the municipality entered into a written agreement with another municipality or a contract with another entity to perform one or more of the conditions of the general permit as provided under Section 2.10 of the general permit? Yes No
	If yes, describe these cooperative efforts:
	Waukesha County for Sections 2.1 and 2.2; Yaggy Colby Associates for Sections 2.6 through 2.9
e.	Does the municipality have an internet website?
	If yes, provide web address: www.service-life.com/wi/townoconomowoc/
	If the municipality has an internet website, is there current information about or links provided to the MS4 general permit and/or the municipality's storm water management program? Yes No
	If yes, provide web address:
	www.service-life.com/wi/townoconomowoc/
	ECTION V. Permit Conditions
a.	 Minimum Control Measures: For each of the permit conditions listed below, provide a description of the status of implementation of program elements, the status of meeting measurable goals, and compliance with permit schedule in section 3 of the MS4 general permit. Provide an evaluation of program compliance with the general permit, the appropriateness of identified best management practices, and progress towards achieving identified measurable goals. Be specific in describing the actions that have been taken during the reporting year to implement each permit condition and whether measurable goals have been met, including any data collected to document a measurable goal. Also, explain the reasons for any variations from the compliance schedule in the MS4 general permit. Public Education and Outreach See attached.
	Public Involvement and Participation See attached.
	Illicit Discharge Detection and Elimination See attached.
	Construction Site Pollutant Control See attached.
	Post-Construction Storm Water Management See attached.
	Pollution Prevention See attached.
b.	Storm Water Quality Management: Has the municipality completed a pollutant-loading analysis to assess compliance with the 20% TSS reduction developed urban area performance standard? • Yes • No
	If yes, provide the following: Model used SLAMM Version 9.3 Reduction (%) 43.5
	If no, include a description of any actions the municipality has undertaken during 2013 to help achieve the 20% standard.
	Has the municipality completed an evaluation of all municipal owned or operated structural flood control facilities to determine the feasibility of retrofitting to increase TSS removal? Yes No If yes, describe:

31285 Town of Oconomowoc	
FIN / Municipality Name	

Form 3400-195 (R 12/13)

Page 3 of 6

S	ECTION V. Permit Conditions (continued)
	Best Management Practices Maintenance: Does the municipality have a maintenance program for installed storm water best management practices? Yes No
	If yes, describe the maintenance program and any maintenance activities that have occurred for best management practices in 2013. If available, attach any additional information on the maintenance program.
	The Town's staff monitors their proprietary devices at a minimum of once per year and schedules maintenance as needed.
d.	Storm Sewer System Map: Describe any changes or updates to the storm sewer system map made in the reporting year. Provide an updated map if any changes occurred during the reporting year. No changes have occurred in 2013.
9	ECTION VI. Fiscal Analysis
	Provide a fiscal analysis that includes the annual expenditures for 2013, and the budget for 2013 and 2014. A table to document fiscal information is provided on page 5.
	See table.
b.	What financing/fiscal strategy has the municipality implemented to finance the requirements of the general permit?
	Storm water utility General fund Other
C.	Are adequate revenues being generated to implement your storm water management program to meet the permit requirements? Yes No
u	ease provide a brief summary of your financing/fiscal strategy and any additional information that will assist the Department in nderstanding how storm water management funds are being generated to implement and administer your storm water management ogram.
	Appropriate funds are set aside during the budgeting process. See attached for notes regarding the funding.
S	ECTION VII. Inspections and Enforcement Actions
N	ote: If an ordinance listed below has previously been submitted and has not been amended since that time, a copy does not sed to be submitted again. If the ordinance was previously submitted, indicate such in the space provided.
a.	As of the date of this annual report, has the municipality adopted a construction site pollutant control ordinance in accordance with subsection 2.4.1 of the general permit? No If yes, attach copy or provide web link to ordinance:
	The Town utilizes Waukesha County's construction site pollutant control ordinance.
b.	As of the date of this annual report, has the municipality adopted a post-construction storm water management ordinance in accordance with subsection 2.5.1 of the general permit? No If yes, attach copy or provide web link to ordinance:
	The Town utilizes Waukesha County's post-construction site pollutant control ordinance.
C.	As of the date of this annual report, has the municipality adopted an illicit discharge detection and elimination ordinance in accordance with subsection 2.3.1 of the general permit? No If yes, attach copy or provide web link to ordinance:
	The Town utilizes Waukesha County's illicit discharge and detection ordinance but does their own screening.
d.	As of the date of this annual report, has the municipality adopted any other ordinances it has deemed necessary to implement a program under the general permit (e.g., pet waste ordinance, leaf management/yard waste ordinance, parking restrictions for street cleaning, etc.)? Yes No If yes, attach copy or provide web link to ordinance:
e.	Provide a summary of available information on the number and nature of inspections and enforcement actions conducted during the reporting period to ensure compliance with the ordinances described in a. to d. above. See attached description provided by Waukesha County.

SECTION	VIII.	Water Qualit	v Concerns

а	. Does any part of the MS4 discharge to an outstanding resource water (ORW) or exceptional resource water (ERW) listed under s. NR 102.10 or 102.11, Wis. Adm. Code? (A list of ORWs and ERWs may be found on the Department's Internet site at: http://dnr.wi.gov/topic/SurfaceWater/orwerw.html) Yes No If yes, list:
	Oconomowoc River (from below North Lake to Okauchee Lake)
b	Does any part of the MS4 discharge to an impaired waterbody listed in accordance with section 303(d)(1) of the federal Clean Water Act, 33 USC § 1313(d)(1)(C)? (A list of the most current Wisconsin impaired waterbodies may be found on the Department's Internet site at: http://dnr.wi.gov/water/impairedsearch.aspx?status=303d) Yes No If yes, complete the following:
	Impaired waterbody to which the MS4 discharges:
	Lac La Belle, Fowler Lake and Oconomowoc Lake. Additionally, 4 reaches are listed for the TMDL they are as follows:
	1) Reach 20 - Rock River from Mile 296 to Mile 305; 2) Reach 21 - Rock River from Oconomowoc River to Mile 270; 3) Reach 24 - Mason Creek from Mile 0 to Mile 5.2; and 4) Reach 25 - Oconomowoc River from Battle Creek

- Description of actions municipality has taken to comply with section 1.5.2 of the MS4 general permit for discharges of pollutant(s) of concern to an impaired waterbody:
 - The Town applied for an Urban Non-Point Source Planning Grant and will use funds to create a comprehensive storm water plan to address water quality improvement of impaired waters within the municipality.
- c. Identify any known water quality improvements in the receiving water to which the MS4 discharges during the reporting period. None known.
- d. Identify any known water quality degradation in the receiving water to which the MS4 discharges during the reporting period and what actions are being taken to improve the water quality in the receiving water.
 None known.

SECTION IX. Proposed Program Changes

to Mason Creek

Describe any proposed changes to the storm water management program being contemplated by the municipality for 2014 and the schedule for implementing those changes. Proposed program changes must be consistent with the requirements of the general permit. The Town will implement the anticipated permit requirement changes as it applies to TMDLs and pollution prevention.

2013 Town of Oconomowoc Annual Report Attachment

SECTION IV. General Information

a. Describe what efforts the municipality has undertaken to invite the municipal governing body, interest groups, and the general public to review and comment on the annual report.

The Town uses a variety of meetings and media to reach its citizens with current events and issues. Citizens are encouraged to attend and participate in Town Board, Plan Commission, and other Town meetings. The agenda for these are published on the Town's website and posted in public places. The Town will post the Annual Report at the Town Hall for the general public to view. The Town's website has a Storm Water link that includes information regarding the MS4 permit and information provided by the County. MS4 related activities available for the Town's residents are posted on the Town's website when applicable.

b. Describe how elected and municipal officials and appropriate staff have been kept apprised of the municipal storm water discharge permit and its requirements.

The elected and municipal officials have been proactive in making sure they are familiar with the permit and its various requirements. The Town Board and Town's Plan Commission have been informed of the NR 151 & 216 permit programs and its goals. The Town Engineer has attended various seminars regarding the conditions of the general permit and works closely with DNR staff to ensure that the Town has access to the most recent developments and updates as it relates to the permit requirements. The Town Engineer meets with Town officials on a normal basis and keeps the Town apprised of any changes or issues that affect the Town.

e. Does the municipality have an internet website?

The Town has created a new website and they are trying to make it more interactive for their residents. The Town is making an effort to put applicable information regarding storm water and the MS4 permit on the website to provide the residents with past and current information.

SECTION V. Permit Conditions

a. Minimum Control Measures

- Public Education and Outreach The Town has entered into a contract with Waukesha County to provide this portion of the permit requirements. The Town will encourage its residents and officials to participate in the activities developed by the County and also provide its residents with information developed by the County. The Town, through its consultant and officials, will actively stay informed on the County's program and provide positive examples for their residents.
- Public Involvement and Participation The Town entered into the Waukesha County agreement and this is portion of the program is also part of that agreement. The above paragraph describes how the Town intends to encourage both their residents and officials to participate in the County's program. The County's report has been submitted to the DNR for review, as well as reported in Work Plan meetings. The Town's consultant has participated in the County Work Plan meetings and has provided the Town with minutes from those meetings. The Town's consultant also routinely meets with the Town's administrator to discuss MS4 permit requirements, as it relates to the ongoing business of the Town. The Town administrator, as well as the consultant, updates the Town's staff on issues that affect the Town's business as it relates to the permit. The Town also joined the Rock River TMDL group (Rock River Coalition), additionally their consultant, Yaggy-Colby Associates also joined the group.
- Illicit Discharge Detection and Elimination The Town utilizes Waukesha County's illicit discharge ordinance. Town staff has been made aware of the issues and actively observe the Town's various storm sewer conveyances and will take note and take proper actions if anything of concerns is detected.
 - A comprehensive dry weather screening of all the identified outfalls was performed in 2009. A schedule was also created that outlines the outfalls that need to be screened every three years (approximately 1/3 of all are done each year in order to screen them every 3 years). Dry weather screening was performed on September 24th and 25th of 2013. Each outfall on the schedule was observed, picture(s) taken and any deficiencies noted and transferred to a spreadsheet that is being kept by the consultant. No illicit discharges were noted. Some minor deficiencies have been noted and the Town staff will utilize the screening to schedule maintenance where needed. It should also be noted that an updated dry weather screening map was created to assist Town staff conduct the screenings. The screening rotation has started over again in 2013.
- Construction Site Pollutant Control The Town utilizes Waukesha County's construction site pollutant control ordinance. The Town works with and

communicates with the County in order to better understand the status of work being done within the Town. A list of the construction sites with permits has been compiled by the County and is included in this report.

• Post-Construction Storm Water Management – The Town utilizes Waukesha County's post-construction storm water management ordinance. The Town does recognize the need for proper storm water management facility maintenance and therefore is developing inspection procedures for the facilities located within the Town. A standardized checklist form has been created by the Town's consulting engineer that will be used to inspect the facilities within the Town. This basin inspection process is still being developed and no storm water facilities have been formally inspected. It should be noted that during the dry weather screening process, storm water facilities are being observed and any deficiencies noted and if any serious issues are followed up on and addressed with the landowner. This has not yet been needed or necessary but until a more formal procedure is implemented this will be the process to make sure facilities are functioning properly.

• Pollution Prevention

Routine inspection and maintenance of municipally owned or operated structural storm water management facilities to maintain their pollutant removal operating efficiency.

The Town's Highway Superintendent or staff performs routine inspection and maintenance on municipally owned or operated structural storm water management facilities. There are currently four municipally owned storm water proprietary devices that collect and separate pollutants prior to entering Okauchee Lake. The Town contracts the vacuuming and removal of the collected debris with Doc's Sewer & Water. The structures are routinely monitored and serviced at least once per year. The contractor is responsible for disposal of all collected materials.

Routine street sweeping and cleaning of catch basins with sumps where appropriate.

In order to clean any material left on the roadway, the Town contracts out sweeping to Sweep All, who sweeps the Town's streets and curb and gutter areas routinely. The downtown Okauchee area is the primary area swept.

All catch basins within the Town are inspected once per year. Town staff determines if hand removal or vacuuming is necessary. Typically the catch basins are inspected prior to Doc's Sewer & Water coming to Town for the services described above. If catch basins are in need of vacuuming, then the contractor will do it in the same service trip as removing the debris from the

municipally owned structures. Doc's Sewer & Water is responsible for the disposal of this material.

Proper disposal of street sweeping and catch basin cleaning waste.

As mentioned above, Sweep All is contracted to perform sweeping and disposal. The material collected is cleaned of debris and mixed into the Town's gravel pile to be used for shouldering. Approximately 30 cubic yards was collected in the Spring of 2013.

If road salt or other deicers are applied by the permittee, no more shall be applied than necessary to maintain public safety.

The Town limits the amount of road salt and sand that is applied to the roads to whatever is necessary to maintain public safety. It should be noted that the Town tends to use more sand in the mix in extremely cold weather and more salt when the temperature is closer to freezing. The Town strives to use the best mixture for the conditions and minimize the amount of material used. The Town plows approximately 82 lane miles of roadway.

```
In 2013, 1,630 tons of salt & 475 tons of sand were used; In 2012, 1,600 tons of salt & 315 tons of sand were used; In 2011, 900 tons of salt & 90 tons of sand were used; In 2010, 1,044 tons of salt & 430 tons of sand were used; In 2009, 1,200 tons of salt & 581 tons of sand were used; In 2008, 1,200 tons of salt & 500 tons of sand were used; In 2007, 1,150 tons of salt & 500 tons of sand were used.
```

Proper management of leaves and grass clippings, which may include on-site beneficial reuse as opposed to collection.

The Town utilizes its transfer site for leaves and grass clippings. The leaves and clippings are composted. The compost is then available for Town and community members use.

Storm water pollution prevention planning for municipal garages, storage areas and other sources of storm water pollution from municipal facilities.

The Town currently keeps their salt and/or sand under cover. The Town does conduct routine maintenance inspections of their yard in order to ensure proper pollution prevention measures are being taken and followed. The Town contracts to Environmental Services for vacuuming the shop floor drains; this was done once in 2013 which is typical for each year.

2.6.7 Application of lawn and garden fertilizers on municipally controlled properties, with previous surfaces over 5 acres each, in accordance with a site-specific nutrient application schedule based on appropriate soil tests.

The soccer club in the Town fertilizes the soccer fields. The Town has a no phosphorous fertilizer ordinance.

2.6.8 Education of appropriate municipal and other personnel involved in implementing this program.

The Town trains its staff that is involved with the pollution practices mentioned above. The Town's Administrator (Jeff Herrmann) has met with the DNR regarding the requirements of the MS4 permit. The Town's consulting engineer also discusses various elements of the program with the Administrator and when applicable also meets with the Town's personnel.

2.6.9 Measures to reduce municipal sources of storm water contamination within source water protection areas.

Not applicable within this community.

SECTION VI. Fiscal Analysis

The Town budgets money towards this program each year and normally uses the Town's General Fund to do so. The Town is within the Rock River watershed and therefore is affected by the new TMDL requirements for water quality. In anticipation of these new permit requirements, the Town applied for a grant to help offset the costs to implement the TMDL requirements. If approved, the grant funds would be used, in conjuncture with the Town's cost share, to create a storm water management plan that addresses total suspended solids and phosphorus removal per the waste load allocations allowed.

SECTION VII. Inspections and Enforcement Actions

c. Provide a summary of available information on the number and nature of inspections and enforcement actions conducted during the reported period to ensure compliance with the ordinances described in a. to d. above.

Town of Oconomowoc

2013 Construction Site Inspections and Enforcement Action Summary

Inspections

60 construction inspections by Waukesha County staff 4 Sites passed final inspection (included in total above)

Permits

- 8 Permit applications received
- 7 Permits issued
- 1 Permit extended
- 3 Permits terminated
