

Village of Oakfield Swimming Pool Fill Policy (Updated 6/14/17)

- A. Any customer of the Village of Oakfield Water and Sewer Utility will be allowed a sewer usage credit **once a year** for the filling of a swimming pool. The credit will be based on the current sewer usage rates at the time of the pool filling.
- B. The customer must notify the Village Office before and after the pool filling takes place so that a Public Works employee can read the meter. No credit will be given if this procedure is not followed.
- C. Pool filling must be done during the week; no weekend pool filling. If a resident chooses to fill their pool over the weekend, no credit will be given.
- D. The fee for reading the meter prior to filling and after filling in order to calculate a sewer credit from pool filling will be \$40.00 total.
- E. Swimming pool filling may be done from a hydrant only if a hydrant is located on the same side of the road and Public Works determines the hydrant is available. There will be an additional charge for using a hydrant to fill a pool as regulated by the Wisconsin Public Service Commission on the current tariff on file for the Village of Oakfield. **Hoses for filling from a hydrant will NOT be used across any roadway or anyplace deemed unsafe as determined by Public Works.** **The Village discourages the use of hydrant filling due to the potential for higher water pressure and water temperature to cause damage to pool liners.**
- F. The filling of a swimming pool must be completed within 48 hours from the start of filling.
- G. Every attempt will be made to attach a meter to the outside faucet used for filling.
